The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/589,704	Applicant(s) ROSS, BRUCE WILLIAM	
	Examiner DANIEL F. ROLAND	Art Unit 3764	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1: Figures 1-7.

Species 2: Figure 8.

Species 3: Figures 9-10.

Species 4: Figures 11-12.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species 1: Claims 1-9, and 12

Species 2: Claims 1, 10, 12-13, and 15

Species 3: Claims 1, 10, 12-13, and 16

Species 4: Claims 1, 11, and 14

The following claim(s) are generic: 1.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The only common technical feature common to the species is an apparatus comprising a main frame having a base, a front portion and a back portion having an upright portion spaced from the front portion, a moveable carriage slidable with respect to the front portion of the main frame, a cable connected by one of its ends to the carriage and extending from the front portion to the upright portion, and a weight pivotally mounted on the upright portion connected to the other end of the cable and positioned above the base of the main frame rearward of the front portion. However, since this feature is known in the art, there exists a lack of unity *a posteriori*, and it is not the applicant's contribution over the prior art. US Patent 5,637,063 to *Fuller* discloses an apparatus comprising a main frame (11) having a base, a front portion and a back portion having an upright portion (17) spaced from the front portion, a moveable carriage (31) slidable with respect to the front portion of the main frame, a cable (52) connected by one of its ends to the carriage and extending from the front portion to the upright portion, and a weight (22) pivotally mounted on the upright portion connected to the other end of the cable and positioned above the base of the main frame rearward of the front portion, the

arrangement being such that a driving force on the carriage causes the weight to rise thereby providing resistance to the drive force on the carriage.

4. A telephone call was made to Jerry Dainow on 5/19/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANIEL F. ROLAND whose telephone number is (571)270-5029. The examiner can normally be reached on Monday - Friday (7:30-5:00) Alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, LoAn Thanh can be reached on (571) 272-4966. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
